About Us

With more than fifty years of experience on our own quarries, factories and close cooperation contracts with important partners, Marmonix was founded in 2005 in Dubai to meet the International needs. International trade has always been one of the main focuses of us.

With leading technology and comprehensive knowledge Marmonix has exported different kind of marble to various destinations such as United States, Australia, Europe, Gulf and CIS countries.

We believe successful business is often a product of management, honesty and hard work. With great installation team, Marmonix will provide you with the best customer experience including supplying, design, installation, and after sales service.

Quarrying

In order to supply the required raw stone for its own manufacturing as well as export purposes, Marmonix owns 6 quarries with the following stone types and geographic locations.

Meanwhile, we have signed several long-term exclusive contracts with other quarries such as Kashmar marble and Payeez marble. Quality as the main focus leads us to always select the best raw stone from the quarries.

Owning the quarries helps us increase our supply capabilities to meet customers need in any scale.

Factory

SLAB PRODUCTION

In the last decade, due to higher demand for custom-sized slabs, we are proud to be among the few stone companies meeting this market's needs with the highest quality, modern machinery, and extensive knowledge. Blocks get cut into unpolished slabs with 80 blades gang saw and after final polish, makes processed slabs ready for particular sizes such as 80x100, 80x120, 100x120 centimeters.

TILE PRODUCTION

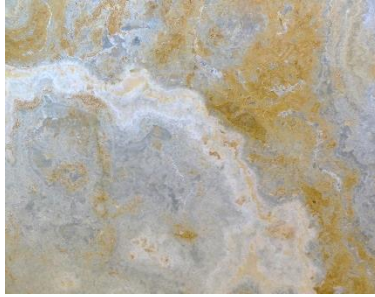

Thickness of stone tile, due to glue usage in installation, must have the tolerance of less than 1 millimeter. Calibrating machine provides equally sized strips with 0.1 millimeter accuracy.
